PORTFOLIO

<https://crepantherx.dev/>

Currently I am pursuing B. Tech in Information Technology from 2017-2021 at Gautam Buddha University, Noida, India.

What matter the most is how well can you present your business to your client for a profitable margin. I can do this task in a very minimal, presentable, simplified manner that'll help others to grow their business ideology.

The more people know about technological jargon, more will be the competition. Therefore, we all can grow together to out pass America , Britain in field of technology. I love my country and will do anything to make it more successful than USA.

honestly, I would be very happy to serve my capabilities to a seeker at my best that i can offer and continue to enhance my knowledge further.

Thank You
